Education

Indian Institute of Information Technology, Gwalior

Bachelor of Technology in Computer Science and Engineering

Expected May 2026

Gwalior, Madhya Pradesh, India

Relevant Coursework

- Data Structures
- Algorithms
- Artificial Intelligence
- Operating Systems
- Software Engineering
- Database Management
- Computer Networks
- Computer Architecture

Experience

Bit By Bit Studio

May 2025 – Jul 2025

Full Stack Developer Intern

Remote

- Developed a dental clinic appointment system enabling patients to book and manage visits online.
- Built responsive dashboards with **10+ UI components** for doctors and patients to manage appointments.
- Structured reusable **React + Tailwind CSS components** to ensure UI consistency and reduce development time.
- Integrated frontend with **6+ REST API endpoints** to handle appointment booking and user actions.
- Managed codebase using **Git and GitHub** through branching, pull requests, and peer code reviews.

Technical Skills

Languages: JavaScript, TypeScript, C/C++, Java, Python, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Angular, Tailwind CSS, Shadcn UI

Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Docker, Firebase, Prisma

Core Skills: RESTful API Design, Authentication (JWT, OAuth), Responsive UI, CI/CD, Performance Optimization

Projects

FinBoard – Customizable Real-Time Finance Dashboard | *Next.js, React, Zustand, REST APIs* Dec 2025 – Jan 2026

- Created a customizable finance dashboard supporting **4 widget types** (Cards, Tables, Charts, Market Gainers) using Next.js and React.
- Consumed **4 external REST APIs** (CoinGecko, Alpha Vantage, Finnhub, IndianAPI) to fetch and display real-time financial datasets.
- Implemented **3 server-side API proxy routes** to handle CORS, data normalization, and symbol lookup.
- Configured JSON-based widget mapping to translate API responses into UI components for flexible data rendering.
- Introduced client-side caching and configurable auto-refresh intervals to minimize redundant API calls.

MediMeet – Doctor Appointment Platform | *Next.js, Prisma, Tailwind CSS*

Oct 2024 – Nov 2024

- Launched a telemedicine platform with **3 role-based dashboards** for patients, doctors, and administrators across **16 medical specialties**.
- Designed backend workflows using **Next.js Server Actions** with **6+ API routes** for authentication, scheduling, and appointment booking.
- Connected **Vonage Video API** to enable secure real-time doctor–patient consultations using session tokens.
- Architected relational database schema using **Prisma ORM** across **5 core models** to manage users, appointments, and doctor availability.
- Enforced appointment slot validation and conflict checks to prevent double booking during scheduling.

Doubtify – Doubt Solving Platform | *MERN, Tailwind CSS*

May 2024 – Jul 2024

- Engineered a MERN-stack academic Q&A platform with **10 core features** including posting, answering, commenting, bookmarking, drafts, and voting.
- Secured **10+ protected routes** using **JWT and bcrypt** for session management and role-based access control.
- Applied debounced search and category filters across **15 question topics** to improve content discoverability and navigation.
- Enabled profile image and file attachment uploads by wiring **Cloudinary** with Multer middleware.

Achievements

- Solved **600+** data structure and algorithm problems across LeetCode, CodeChef, and GeeksforGeeks.
- Earned a **3-star rating on CodeChef** through consistent participation in competitive programming contests.
- **Gold Medalist** at URJA 2025 (Annual Sports Fest at IIIT Gwalior).
